The beautiful coasts and the countless idyllic lakes in Scandinavia provide ideal environment for practicing all kinds of water sports. Here the products of the company SEILFLECHTER are used perfectly. They are also preferred in the overhead line construction business.

Oliver Griesse, owner of the Norwegian company OGRI, which has been a global partner in the energy and construction industry for 20 years, knows this.

On January 10th, 2023 he visited the traditional company SEILFLECHTER, which has been in existence for over 275 years, in its factory in Braunschweig. OGRI's many years of experience and competence in the field of overhead line construction has been known there for a long time.

As a result of a joint meeting SEILFLECHTER and OGRI look forward to a future of cooperation. The cooperation agreed upon includes textile ropes for overhead line construction and the sale of water sports accessories for the Scandinavian area. As a rope manufacturer for winches and pulling ropes, the company SEILFLECHTER Tauwerk GmbH which operates in the specialist trade throughout Europe will have OGRI as a partner in the future.

Seilflechter Tauwerk GmbH

Tradition meets the future: SEILFLECHTER Tauwerk GmbH offers quality cordage "Made in Germany" for the areas of industry, forestry, agriculture, off-road, construction, events and water sports. The products are distributed throughout Europe via specialist retailers. At the main plant in Braunschweig, the company produces around 140,000 meters of rope per day. Whether technology for lifting, pulling or securing, the traditional family business since 1745 always has a suitable rope for the desired task. Safety testing for man and machine is foremost regardless of other requirements. Wherever it serves society, the company has a multifaceted approach. In addition, individually tailored specialist seminars on operational safety are offered. More than 275 years of professional rope making - now managed in the 10th generation by shareholder Andreas Halle.
